[Important Notes]

==========

- The system will automatically reboot after the software update.

[Upgrade Notes]

==========

[Network]

[Interfaces]

- Fixed a connection issue when the interface was set to Bridge mode with the "Source Interface" option enabled.

[Policy]

[Security Policy]

- Fixed an issue that could cause errors when editing IPsec settings in certain cases.

[Others]

[System]

- Fixed potential security issues related to PHP RCE vulnerabilities (CVE-2026-109618 and CVE-2026-109619).
- Fixed a security issue where some interfaces did not properly check license status.
