[Attention]

● After the update, the system will auto-reboot, automatically resuming paused services.

[Update Details]

Administrator Interface

Device Setting
[Device Command]
  • Add [Basic Setup] > "General" > "SMTP(S) SSL High Level" setting.
[High Availability]
  • Fix Database sync is unfinished. During the pause, the standby device is wrongly activated.
Device Notice
[Device Message Notification]
  • Fix [Line Notify List] Unable to send notification.
Architecture
  [IMAP Proxy]
  • Fix In some scenarios, OAuth authentication is successful, but the folder is empty.
  [ShareTech Sync]
  • Fix In some scenarios, sync fails with too much data for synchronization.
  • Fix Manual sync and scheduled sync are redundantly executed.
Authentication & Permissions
  [Domain Management]
  • Fix In some scenarios with AD authentication, the Admin account and password of domains synced via [Architecture > ShareTech Sync]
are incorrect.
  [User Management]
  • Fix In some scenarios, users synced via AD cannot be deleted.
Mail Audit & Firewall
  [Filter]
  • Fix In some scenarios within gateway mode, the "Abnormal SMTP Flow" rules are incorrectly detected.
  [Advanced Settings]
  • Fix Unable to save other settings without enabling [Mail Encryption] feature package.
  [Mail Firewall]
  • Fix [Mail Firewall Setup] > "Send Abnormal Detection": "Exception Rules" are ineffective.
Mail Encryption
  [Mail Encryption Rule]
  • Fix [New/Edit] > "Encryption Rule Setup" > "Advanced Settings" > "Attachment Size Between (KB)": Settings are ineffective in some
scenarios.
  • Fix [New/Edit] > "Process Method" > "Encryption Recipient": Empty value can be saved when "Recipient" is selected.
ShareTech Sandstorm
[Sandstorm Record]
  • Fix Detailed record of IP Filter shows incorrect IP info.
  • Fix In some scenarios, "Status" info is incorrect.
Anti-Spam
  [Basic Setting]
  • Adjust "AI module" Enhance spam detection mechanism.
  • Fix "AI module" > "Check New Version": After a successful connection, failure info persists.
  • Fix "AI module" > "Check New Version": In some scenarios, the version info is incorrect.
Statistical Report
[Statistical Report]
  • Fix Unable to save when certain items in "Report Type" are not selected.

Log
[Use Log]
   • Fix In [Mail Encryption > Mail Encryption Rule] records, some info is incorrect.
Others
[System]
   • Fix Strengthen system security by disabling certain weak encryption protocols.
   • Fix The impact of CVE-2011-0411 vulnerability.
  [Mail]
   • Fix In some scenarios, no record is generated when the same email has different recipients.
  [Console]
   • Fix [Console] Abnormal input occurs when selecting a hard disk partition for booting.
   • Fix [Console] Even without the bypass function, the relevant settings are still displayed.

User Interface

Home
   • Fix "Log/Information" > "All Mail(General/Spam/Virus)/Today Mail(General/Spam/Virus)": Incorrect info.
Mail
   • Fix Email content displays garbled characters when using emoji texts.
   • Fix In some scenarios, the window incompletely displays email content.
Quarantine
   • Fix In some scenarios, the data is not being displayed according to the search time range.
   • Fix Unable to view detailed info about quarantined mails when they have no content.
